-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- a. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Okita et al. (JP 2002-127817).

Okita discloses a vehicle indication system where a battery charge indicator is used to display direction of turn signal of the vehicle by sequentially activating the indicator lights 6-8 in the direction of the turn (see abstract, Fig. 8).

Regarding claim 3, Okita discloses mounting indicator lights 6-8 at the center of steering handle (Fig. 2).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- b. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Okita et al.

Okita discloses a combination battery indication device and turn signal indicator, except for specifically stating that the sequential activation of lights is repeated.

It would have been obvious to one of ordinary skill in the art to repeat the sequential operation of lights to indicate turning, since such repeated operation is conventional in the art to indicate that a vehicle has not yet completed a turn. One of ordinary skill in the art would have recognized that merely choosing to provide sequential operation once would not have been sufficient, since this may not have attracted a driver's attention, and use of conventional repeated indications would have been desirable to constantly remind a driver of pending turn until it was completed.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yagihashi and Proctor disclose vehicle display systems.

4. It is noted that no English translation of priority documents have been provided, but even if such a translation was submitted, it would still not overcome the publication date of May 9, 2002 of the Okita reference.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent A Swarthout whose telephone number is 571-272-2979. The examiner can normally be reached on M-F from 6:30 to 4:00.
